

FORMULATION II TM

***Contains No Salt
Environmentally Friendly
Effective Melting Below 0 Deg.***

The NO SALT de-icer for SAFE melting of ice and snow.

Formulation II is a special grade of a blended de-icer containing 25 percent potassium chloride, 25% carbonyldiamide (fertilizer products used in the lawn and garden industry) and 50% magnesium chloride. Formulation II is recommended for melting ice and snow down to -10°F. With proper use, safe for concrete and vegetation with no tracking.

PRODUCT NUMBER	PACKAGE SIZE	QUANTITY PER PALLET	UPC CODE
B49450	50# Bag	50 Bags	Not UPC Coded
B4942M	2000# Bag	1 Bulk Bag	Not UPC Coded

Directions For Use

For best results, apply at the rate of 2 - 4oz. (1/4 – 1/2 cup) per square yard evenly over surface areas to be treated. If applying after a large accumulation, it is best to plow or shovel first, then apply the ice melt product. This product may be applied prior to or during accumulation. Remove slush and water to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. To avoid potential damage to vegetation, keep product away from vegetation and do not over apply. Variable weather conditions such as temperature, depth of snow, wetness of snow, and ice content, may vary the recommended application amount.

Components

Potassium Chloride
Magnesium Chloride
Carbonyldiamide

CAS Number

007447-40-7
007786-30-3
000057-13-6
