

# PLOW KING<sup>TM</sup> ICE MELT

If you want the power of an industrial strength de-icer, PLOW KING is the de-icer that should come to mind. PLOW KING is fueled by two distinct active ingredients, calcium chloride and magnesium chloride. Other de-icers need direct contact with moisture to work. PLOW KING'S active ingredients generate their own heat by pulling moisture right out of the air, melting ice and snow on impact in temperatures as low as -15 °F (-26 °C). During the formulation of PLOW KING each granule is treated with a unique blue-colored corrosion inhibitor for better indication of spread pattern and to help fight the corrosive effects of a de-icer. PLOW KING Ice Melt, the industrial strength de-icer that will not back down to any type of winter weather.

PRODUCT NUMBER	PACKAGE SIZE	QUANTITY PER PALLET	UPC CODE
B48350	50# Bag	49 Bags	7 26523 48350 1
B48150	50# Pail	27 Pails	N/A
B4832M	2000# Bag	1 Bulk Bag	N/A

#### Directions For Use

For best results, apply at the rate of 2 - 4oz. (1/4 – 1/2 cup) per square yard evenly over surface areas to be treated. If applying after a large accumulation, it is best to plow or shovel first, then apply the ice melt product. This product may be applied prior to or during accumulation. Remove slush and water to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. To avoid potential damage to vegetation, keep product away from vegetation and do not over apply. Variable weather conditions such as temperature, depth of snow, wetness of snow, and ice content, may vary the recommended application amount.

<b>Components</b>	<b>CAS Number</b>
Potassium Chloride	007447-40-7
Sodium Chloride	007647-14-5
Calcium Chloride	010043-52-4
Magnesium Chloride	007791-18-6
