

XCALIBURTM ICE MELT

Time and the elements are not always on your side. XCALIBUR's special formulation contains a combination of three effective ice melting ingredients; sodium chloride, potassium chloride and calcium chloride. With its exothermic and fast acting properties, calcium chloride ties the formulation together giving XCALIBUR the power to cut through ice and snow in temperatures as low as -10 °F (-23 °C). During the manufacturing process of XCALIBUR each granule is encapsulated with a corrosion inhibitor to help fight against the effects you may experience when using a de-icer. With XCALIBUR you get the best of both worlds, a fast acting de-icer that will outperform the competition in speed, safety and reliability.

PRODUCT NUMBER	PACKAGE SIZE	QUANTITY PER PALLET	UPC CODE
B46310	10# Bag	240 Bags	7 26523 46310 7
B1046312	12# Jug	200 Jugs (50 cases)	7 26523 46312 1
B46320	20# Bag	120 Bags	7 26523 46320 6
B46350	50# Bag	49 Bags	7 26523 46350 3
B46300	100# Drum	18 Drums	7 26523 46300 8
B4632M	2000# Bag	1 Bulk Bag	N/A

Directions For Use

For best results, apply at the rate of 2 - 4oz. (1/4 – 1/2 cup) per square yard evenly over surface areas to be treated. If applying after a large accumulation, it is best to plow or shovel first, then apply the ice melt product. This product may be applied prior to or during accumulation. Remove slush and water to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. To avoid potential damage to vegetation, keep product away from vegetation and do not over apply. Variable weather conditions such as temperature, depth of snow, wetness of snow, and ice content, may vary the recommended application amount.

Components	CAS Number
Potassium Chloride	007447-40-7
Sodium Chloride	007647-14-5
Calcium Chloride	010043-52-4
