# GUARDIAN<sup>®</sup> ICE MELT PRODUCTS

## Traxion

GUARDIAN<sup>®</sup> TRAXION is a high quality ice melt that has been carefully manufactured to provide you with the best of both worlds, instantaneous traction along with an effective triacting de-icer that melts ice and snow down to -5° F. With proper use, TRAXION is safe for concrete and vegetatin with no tracking. Leaves no oily residue.

- **Contains No Salt**
- **Environmentally Friendly**
- **Effective melting Range Below 0° F**

PRODUCT NUMBER	PACKAGE SIZE	QUANTITY PER PALLET	UPC CODE
B49350	50 lb Bag	49 Bags	Not UPC Coded
B4932M	2000 lb Bag	1 Bulk Bag	Not UPC Coded

### DIRECTIONS FOR USE

For best results, apply at the rate of 2 - 4oz. (1/4 – 1/2 cup) per square yard evenly over surface areas to be treated. If applying after a large accumulation, it is best to plow or shovel first, then apply product. This product may be applied prior to light snow or freezing rain to help prevent bonding of moisture to paved surfaces. Remove slush and water to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. Do not place product on or near vegetation as over-application can cause damage. Variable weather conditions such as temperature, depth of snow, wetness of snow, and ice content, may vary the recommended application amount.
