

# XCALIBUR<sup>®</sup> ICE MELT

**Fast Acting on Ice & Snow, Contains a Corrosion Inhibitor,  
Calcium Chloride Formula, Effective melting Range 0° to -10° F**

## ← **FEATURING**

At Mears we make great products that perform. XCALIBUR<sup>®</sup> contains a fast acting RAM CATALYST, which provides accelerated melting power to cut through even the toughest ice and snow.

# XCALIBUR® ICE MELT

When unpredictable weather moves against you, pick up XCALIBUR® to turn the tide in your favor. XCALIBUR®'s special formulation contains a combination of three effective ice melting ingredients: sodium chloride, potassium chloride and calcium chloride. With its exothermic and fast acting properties, calcium chloride forges the formulation together giving XCALIBUR® the edge you need to cut through ice and snow in temperatures as low as -10° (-23° C. ). During XCALIBUR®'s manufacturing process each granule is encapsulated with a corrosion inhibitor to fight against damage and corrosion to concrete you may experience when using another brand's de-icer. Hoist XCALIBUR® to deliver a fast acting de-icer that will outperform the competition's products in speed, safety and reliability.

PRODUCT NUMBER	PACKAGE SIZE	QUANTITY PER PALLET	UPC CODE
B46310	10 lb Bag	120 Bags	7 26523 44320 8
B1046312	12 lb Jug	200 Jugs / 50 Cases	7 26523 46312 1
B46320	50 lb Pail	120 Bags	7 26523 46320 6
B46350	2000 lb Bag	49 Bags	7 26523 46350 3
B46300	2000 lb Bag	18 Drums	7 26523 46300 8
B4632M	2000 lb Bag	1 Bulk Bag	N/A

## DIRECTIONS FOR USE

For best results, apply at the rate of 2 - 4oz. (1/4 - 1/2 cup) per square yard evenly over surface areas to be treated. If applying after a large accumulation, it is best to plow or shovel first, then apply the ice melt product. This product may be applied prior to or during accumulation. Remove slush and water to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. To avoid potential damage to vegetation, keep product away from vegetation and do not over apply. Variable weather conditions such as temperature, depth of snow, wetness of snow, and ice content, may vary the recommended application amount.
