

Lowest Salt Content, Safe for Use Around Vegetation, Magnesium, Calcium and Potassium Chloride Formula and has an Effictive Melting Range of -10° to -15°.

POLARIAP

POLARKAP® allows for ice-melting and the environment to coincide; by bringing a lower salt content to the mix, POLARKAP® allows customers to be conscious of the environment while fulfilling their snow and ice melting needs. POLARKAP® contains an increased amount of both calcium chloride and magnesium chloride. These two energetic icemelting ingredients rapidly turn the tide of man versus snow through the formation of liquid brine that is absolutely essential for fast and effective melting action. At temperatures as low as -15° F (-26° C) POLARKAP® not only outperforms the competition's brand, but is safe on concrete and gentle to surrounding vegetation. POLARKAP® is the perfect choice to keep your sidewalks, parking lots and busy traffic areas free of ice and snow.

Product Number	Package Size	Quantity Per Pallet	UPC Code
B43310	10 lb Bag	240 Bags	7 26523 43310 0
B43310-B	6 # Bale - 10 lb	240 Bags	7 26523 43310 0
B43320	20 lb Bag	120 Bags	7 26523 43320 9
B43350	50 lb Bag	49 Bags	7 26523 43350 6
B43150	50 lb Pail	27 Pails	N/A
B4332M	2000 lb Bag	1 Bulk Bag	N/A

DIRECTIONS FOR USE

For best results, apply at the rate of 2 - 4oz. (1/4 - 1/2 cup) per square yard evenly over surface areas to be treated. If applying after a large accumulation, it is best to plow or shovel first, then apply the ice melt product. This product may be applied prior to or during accumulation. Remove slush and water to prevent penetration of porous areas and cracks in the concrete, as continual thawing and freezing action can cause damage to poor quality concrete. To avoid potential damage to vegetation, keep product away from vegetation and do not over apply. Variable weather conditions such as temperature, depth of snow, wetness of snow, and ice content, may vary the recommended application amount.
